

How to Display Map Images

1. Click on “Tasks”

2. Click on “Display Map Images”

3. Click on the drop-down arrow in the “Select Type” window to choose the type of image you want to see.

- Subdivision Maps

*More options will come in the future.

4. Enter a TR or PM with the number (if you know it). If not, go to step 5.

5. Click on the “Add Documents” button

6. Click on one of colored areas to load the subdivision for that area into the map

7. Add a checkmark to see the CE map in map areas or click on the PDF icon to open the document up
